Enviro Infra Engineers Limited (EIEL) Forays into ZLD Space with ₹400 Crore CETP EPC Order

The Order marks foray of Enviro Infra Engineers Limited (EIEL) in Advance Waste Water Treatment Technologies involving Ultrafiltration, RO, and MVR (Multiple Vapor Recompression)

Expands Geographical Presence in Maharashtra

New Delhi, July 10, 2025: Enviro Infra Engineers Limited (NSE: EIEL, BSE: 544290), a prominent EPC Player in Water & Waste-Water Treatment across PAN India, has announced a significant step forward in its growth journey with its foray into the Zero Liquid Discharge (ZLD) space. The company has secured a prestigious project from the Maharashtra Industrial Development Corporation (MIDC) aimed at pollution control of the Panchganga River worth ₹400 Crore.

The project entails the upgradation of Common Effluent Treatment Plants (CETPs) with advanced ZLD technology in the co-operative industrial estates of Ichalkaranji, Hatkanangale, and Yadrav in Kolhapur district. The scope of work includes design, supply, installation, construction, testing, start-up, commissioning, performance guarantee testing, and operation & maintenance of the CETPs.

This project, with a completion timeline of 24 months, is one of the largest and most critical environmental infrastructure assignments under MIDC's river pollution abatement program.

Commenting on the development, Sanjay Jain, Chairman, Enviro Infra Engineers Limited, said: *"Securing this project marks a pivotal moment for us, as we enter the Zero Liquid Discharge space with a technically advanced, environmentally significant assignment. It not only underlines our engineering capabilities but also represents our strategic expansion into Maharashtra, a state that holds immense potential for sustainable infrastructure development. We are proud to contribute to the environmental restoration of the Panchganga River and look forward to delivering the project to the highest standards."*

With this win, EIEL further strengthens its position as a national player in water and wastewater EPC solutions, aligned with India's long-term environmental goals.

About Enviro Infra Engineers Limited (EIEL):

EIEL is one of the leading EPC Companies in the business of Water and Wastewater Treatment Plants (WWTPs) and Water Supply Scheme Projects (WSSPs) for government authorities/bodies with over 15 years of experience. WWTPs include Sewage Treatment Plants (STPs), Sewerage Schemes (SS) and Common Effluent Treatment Plants (CETPs).

The Company has an in-house team for designing, engineering and construction which makes us self-reliant on all aspects of our business. The teams are supported by third-party consultants and industry experts to ensure compliance and quality standards laid down by the industry and government agencies & departments. We also have our own team for civil construction works thereby reducing dependence on third parties. The scope of our services typically includes design and engineering of the projects, procurement of raw materials, and execution at site with overall project management up to the commissioning of projects. Post commissioning, operations and maintenance of these plants for a certain period of time is generally a part of the award. We have a team of dedicated engineers and personnel focused on operations and maintenance of completed projects.
